

Since 1986 Performa Floor has been serving the Hardwood Flooring Industry with innovative designs and techniques.

We are proud to introduce an exciting new portable system you can use instead of permanent installed hardwood flooring. Our portable floor gives you another option from the traditional portable floors. Due to our creative design and technique, we have produced a beautiful hardwood floor that rolls out and rolls up. Our unique design enables this beautiful floor to transport and roll out almost anywhere that a hard, durable floor is needed.

Why purchase a Performa Floor? Our products enhance each and every situation or location it is laid on. It will increase the number of products that you sell. It shows that you have a commitment to excellence and quality. We are here to enhance your image. This multi use portable hardwood floor allows you to optimize your time. It is easy to roll out and just as easy to roll up. A 10' X 10' floor rolls out to be a 100 square foot surface in just minutes. It's all one piece. No fitting or assembly required.
